Managed EDR for Healthcare

Built on SentinelOne. Powered by CloudWave.

MANAGED ENDPOINT DETECTION & RESPONSE FOR HEALTHCARE

Modern cyber threats don't wait—and neither can your response. CloudWave's Managed EDR service—**built on the proven SentinelOne platform and delivered by our healthcare cybersecurity experts**—helps hospitals detect, contain, and eliminate endpoint threats before they cause harm.

WHY IT MATTERS: A STRATEGIC RISK DEFENSE LAYER FOR HEALTHCARE

Endpoints are the primary attack vector in today's healthcare threat landscape. With the rise of remote access, medical IoT, and cloud-connected workflows, hospitals face increased risk across more surfaces than ever before.

Yet many organizations struggle with:

- Alert fatigue from noisy EDR tools
- Limited in-house security staff to triage and respond
- Fragmented or reactive endpoint defense strategies

CloudWave's Managed EDR, built on SentinelOne, closes the gap—offering 24/7 threat monitoring, expert response, and seamless integration with your broader cybersecurity posture.

24 X7 **THREAT MONITORING** **EXPERT RESPONSE** **SEAMLESS INTEGRATION**

Role of EDR

COMPLY
Demonstrates security controls and reporting to support HIPAA and regulatory compliance

MANAGE
Centralizes endpoint security with automated policy enforcement

DETECT
Identifies endpoint threats in real time with AI-driven analytics

RESPOND
Isolates, contains, and remediates compromised devices quickly

CloudWave

KEY COMPONENTS & FEATURES

- **Behavioral Threat Detection**
  CloudWave's Managed EDR service detects malicious activity in real time with behavioral and contextual analytics using SentinelOne's AI-powered engine.

- **Real-Time Response and Containment**
  CloudWave SOC analysts use SOAR autonomous response capabilities to isolate and neutralize active threats instantly.

- **Automated and Analyst-Led Investigations**
  CloudWave leverages SentinelOne's automation and advanced telemetry to enable our healthcare cybersecurity experts to validate and investigate threats.

- **Healthcare-Specific Threat Intelligence**
  CloudWave's EDR is tuned to healthcare environments, identifying risk across EHRs, PACS, and clinical workstations.

- **24/7 Management by Healthcare Security Experts**
  CloudWave's Security Operations Center, staffed with analysts who understand healthcare workflows and systems, provides a fully-managed EDR solution.

INTEGRATION OPTIONS

- **CloudWave MDR Powered by Google SecOps** integrates with Google Chronicle and Mandiant intelligence for holistic threat correlation and faster response.

- **Advisory Services Bundles**
  Strengthen endpoint posture with Penetration Testing, Incident Response, or Vulnerability Management services.

- **EHR + Endpoint Mapping**
  Correlate endpoint activity with EHR logs, user sessions, and PHI access to surface clinical relevance.

About CloudWave
CloudWave is a leading provider of healthcare cybersecurity and managed services, trusted by over 1,000 hospitals nationwide. By combining industry-leading platforms like SentinelOne with our healthcare-specialized SOC team, we help hospitals proactively defend against threats, protect critical systems and data, respond to incidents, and comply with evolving regulations—ensuring operational resilience and peace of mind.
